

August 9, 2017

Mr. Connell,

The case settled, the Plaintiffs dismissed all allegations against me, released me and are paying partial refund of my fees.

The only defense they looked over was your report when they "changed their stonewalling tune" (Thanks!)

I would really like to study more information you may have, please let me know what's available.

I also would like to know if you have any reference to a good mold Insurance company.

Apparently most every mold sampler and inspector have no clue of what they are doing or of the legal problems they cause with their meaningless one shot mold air sampling and incompetent evaluations of the results.

I wonder just how many hundreds of \$millions are lost every year on bogus sampling.

It's now affirmed Dr. XxxxXxxxx and Xxxxxxx have a long time scheme going by manipulating mold sampling results, etc. Xxxxxxx father is a retired doctor, his mother is a retired attorney having all the old school medical connections to make the diagnoses they "need"

At mediation we were informed that Xxxxx Xxxxx never had cancer, the diagnoses was a "mistake" he had something that resembled cancer.

They played the cancer lie to the very end only recently Xxxxxxx trying to extort my \$15,000.00 bond declaring to my surety that I 'caused' Mr. Xxxxxx' cancer allegedly by a 15 minute 'toxic' exposure.

Its an all in the family scam to defraud Insurance companies on the 'toxic mold' scare tactic.

The upside I'm a lot wiser today than 3 months ago and our new contract covers me well, now I need good Insurance coverage.

Sincerely,
X
